

Medical Spas

What is a Medi-Spa?

A medi-spa is a medical facility that combines non-invasive medical procedures with traditional spa services. Medical procedures are performed by licensed health care professionals and spa services are generally provided by aestheticians.

Why is the number of Medical Spas increasing so rapidly?

- Consumers have limited free time & most procedures at a medical spa last less than 1 hour
- A visit to a medical spa is more affordable and less invasive than cosmetic surgery
- Baby boomers (50% of the population) are interested in wellness and looking their best

What are some of the more commonly performed Medical Spa Services?

- Botox Injections
- Restylane & Dermal Fillers
- Collagen Replacement Therapy
- Microdermabrasion
- Chemical Peels
- Schlerotherapy (Spider Vein Treatment)
- Laser Hair Removal
- Laser Skin Resurfacing (IPL)
- Thermage
- Tattoo Removal
- Photofacials
- Permanent Makeup Application
- Electrolysis
